BREAST CANCER FAMILY REGISTRY BIOSPECIMEN PRODUCT FEES: 2023*

Biospecimens are stored and dispatched from each BCFR site and their respective institution. The cost of acquisition and limited processing of the BCFR biospecimen collections has been covered by BCFR grants. However, maintaining and dispatching biospecimens to researchers generates additional costs that must be paid for by the requesting researcher. Each BCFR site providing biospecimens will prepare and send an invoice. Payment must be received before biospecimens are dispatched (with some exceptions).

*The prices charged will correspond to the date the data and/or biospecimens are requested for delivery *and* all necessary assurance documentation (IRB/ethics, Data Use Agreements, Material Transfer Agreements) has been submitted to the BCFR Informatics Support Center. *Prices shown are U.S. dollars, are inflated approximately 3% annually, and are subject to change.*

Administrative fees¹ (site specific)	\$ SEE NOTE¹
--	--------------------------------

<u>EDTA Blood Product</u>	Number requested	Cost per specimen	Subtotal \$
DNA distribution ^{2,3}	N = _____	@ \$22.00/specimen	\$ _____
Plasma distribution	N = _____	@ \$27.00/specimen	\$ _____
Guthrie (dried blood spot) distribution	N = _____	@ \$22.00/specimen	\$ _____
DNA extraction from WBC Buffy Coat	N = _____	@ \$54.00/specimen	\$ _____
EDTA Blood Subtotal			\$ _____

<u>Buccal, Mouth Wash or Saliva</u>	Number requested	Cost per specimen	Subtotal \$
DNA distribution ^{2,3}	N = _____	@ \$22.00/specimen	\$ _____
DNA extraction from Buccal, Mouth Wash or Saliva	N = _____	@ \$54.00/specimen	\$ _____
Buccal Wash or Saliva Subtotal			\$ _____

<u>Lymphoblast Cell Line Product</u>	Number requested	Cost per specimen	Subtotal \$
DNA distribution from cell-line ^{2,3}	N = _____	@ \$17.00/specimen	\$ _____
DNA extraction from cell-line	N = _____	@ \$54.00/specimen	\$ _____
Frozen cell-line distribution <i>(available only if a cell line has already been established and there are at least 4 vials of LCLs in storage. Otherwise a cell line will need to be thawed and re-grown (see cost to re-grow))</i>	N = _____	@ \$23.00/specimen	\$ _____
Re-growth to provide frozen LCL for distribution <i>(required if there is a cell line already established but there are fewer than 4 vials of LCLs in storage)</i>	N = _____	@ \$151.00/specimen	\$ _____
EBV transformation and QC <i>(required if a cell line has not already been established)</i>	N = _____	@ \$398.00/specimen	\$ _____
Lymphoblast Cell-Line Subtotal			\$ _____

Tumor Tissue Product	Number requested	Cost per specimen	Subtotal \$
Paraffin-embedded tissue (PET) slide distribution	N = _____	@ \$23.00/specimen	\$ _____
Fresh frozen tissue ⁵ distribution (excised piece)	N = _____	@ \$44.00/specimen	\$ _____
PET block sectioning <i>(if all stored slides are exhausted and block is in-house)</i>	N = _____	@ \$52.00/specimen	\$ _____
PET block sectioning <i>(if all stored slides are exhausted and block is not in-house and must be requested)</i>	N = _____	@ \$160.00/specimen	\$ _____
Additional sections from PET blocks	N = _____	@ \$19.00/specimen	\$ _____
Pathology review & H&E marking for macrodissection	N = _____	@ \$22.00/specimen	\$ _____
Macrodissection for DNA extraction	N = _____	@ \$24.00/specimen	\$ _____
DNA distribution from tissue (PET or fresh frozen) ^{2,3}	N = _____	@ \$22.00/specimen	\$ _____
DNA extraction from PET tissue	N = _____	@ \$62.00/specimen	\$ _____
DNA extraction from fresh frozen tissue ⁵	N = _____	@ \$62.00/specimen	\$ _____
Scanned H&E with a scanned image already in house	N = _____	@ \$10.00/image	\$ _____
Scanned H&E without a scanned image already in house	N = _____	@ \$25.00/image	\$ _____
Tumor Tissue Subtotal			\$ _____

DNA QUANTIFICATION^{2, 3, 4}	Number requested	Cost per specimen	Subtotal \$
Fluorescent dye DNA quantification ⁴	N = _____	@ \$11.00/specimen	\$ _____
Spectrophotometry DNA quantification ⁴	N = _____	@ \$7.00/specimen	\$ _____
Re concentrating DNA to increase concentration ³	N = _____	BCFR center-specific	\$ _____
DNA Quantification Subtotal			\$ _____

INVOICE TOTAL	
Biospecimen Subtotal	\$ _____
Administrative fees¹ (site specific)	\$ _____
Institutional indirect cost (site-specific)	\$ _____
Packing of shipment	\$ _____
Courier (if Applicant is not providing a courier account number)	\$ _____
TOTAL (U.S.)	\$ _____

¹ **Administrative fees** include local administrative and programming (non-laboratory) costs including IRB/ethics approval, MTA preparation, inventory management, sample selection and QC, dataset preparation, requests for data not available at the BCFR Informatics Support Center and must be provided by individual BCFR sites, and special requests. Administrative fees are determined by each respective PI and typically range \$1,000 - \$2,000 per site and per dispatch request.

² DNA stock concentrations vary. Requests for concentrations requiring a dilution will be provided at the distribution cost.

³ Requests for DNA concentrations requiring re-concentration *may* be available for a per sample fee. When not available, the sample volume will be adjusted to meet the total DNA quantity.

⁴ Standard method of quantitation is spectrophotometry (e.g., Nanodrop). Stock DNAs may need to be re-quantified for dispatching. Fluorescent dye DNA quantification (e.g., Picogreen, Qubit) may be requested.

⁵ Not available for all subjects / limited availability
